FOR IMMEDIATE RELEASE

Connecticut-based Technology Providers Offer Comprehensive
Business Continuity Planning and Support Solution

December 6, 2016, New London, CT – RecoveryPlanner, a leading service provider of Business Continuity Management Solutions, has partnered with ePath Learning Inc., an award-winning provider of Cloud-based Learning Technology Solutions, to provide their customers with a comprehensive service, training and support solution. The solution combines RPX, RecoveryPlanner's Business Continuity (BCM) software platform, with RPX University; a customized learning management portal powered by ePath Learning's ASAP LMS. RPX University was designed to add customer value by delivering training and tools that support RecoveryPlanner's clients' in their overall business continuity planning success. RPX University made its official debut at RecoveryPlanner's RPX Users Conference held last month.

"Gartner Inc. suggests that there is a growing need for Business Continuity Management planning software vendors to provide their customers with related training and program awareness," stated Monica Goldstein, COO, RecoveryPlanner. "Training is part of best practices; some industries are regulated to make training part of their Business Continuity program and our own experience indicates that often there is a need to provide additional RPX software training to our clients given the nature of employee attrition and turnover. Therefore; we made the decision to meet the needs of our customers head on by implementing RPX University."

RPX University provides RPX users access to training materials, tests, pre-built curriculums and learning paths. RecoveryPlanner also provides scheduled reports so that customers can manage and track their employees' progress within their training program. After experiencing RPX University, clients seeking to expand their own organization's learning and development initiatives using a similar portal are encouraged to contact RecoveryPlanner, as they are an official reseller of ePath Learning ASAP.

The two technology companies met in 2013 while on a U.S. Department of Commerce trade mission to Australia. Since then, both companies have continued to prosper globally. ePath Learning has earned numerous awards for both their technology and eLearning design services.

RecoveryPlanner has also earned an impressive array of accolades and awards. Most notably the RPX software has been positioned as a Leader in all 3 of Gartner's "Magic Quadrant for Business Continuity Management Planning Software, Worldwide" as well as the 2016 MQ for "IT Vendor Risk Management." In 2016 they were honored with the President's "E" Award for Export; the highest recognition any U.S. entity can receive for making a significant contribution to the expansion of U.S. exports.
