

# Training Technology Solutions for Healthcare Organizations

## Deliver, Manage and Track Employee Training

Healthcare organizations have stringent training requirements and technology makes it easier than ever before for you to manage your training and compliance initiatives. ePath Learning's learning management technology lets you create or import training courses and materials, assign, administer, track and report on your training efforts. The cloud-based technology is easily accessible via the Internet; therefore your employees can access their training materials from anywhere, at any time day or night, and from any mobile device as long as they have an Internet connection.

## Assign Training Based on Employee Needs

Administering training based on employee job type or role ensures that your team receives just the content they need when they need it. Learning paths are easily developed that guide your employees through their development. You can schedule annual training requirements and deliver email alerts to remind employees of upcoming training events and expected due dates. You can even schedule, track and report on blended learning events including instructor-led training, webinars, or "read and acknowledge" support materials such as Standard Operating Procedures, for example.

## Content is Key and its Easy to Upload or Purchase

Our learning management technology is content neutral; meaning it can launch and track any AICC and SCORM compliant courses - and if you're looking for off-the-shelf content, we've got that too! Our technology is validated and 21 CFR Part 11 compliant. It supports electronic signature and version control. A time-stamped audit trail of all changes made to your materials and interactions within the platform is always readily available.

## Our goal at ePath Learning is quite simple – it's to help you be successful:

- Training and developing your employees
- Ensuring the safety and well-being of your staff
- Enhancing the overall quality of patient care and safety
- Meeting compliance with state & federal regulatory bodies

**ePath Learning is the ideal partner for those healthcare organizations seeking comprehensive online training and development solutions. Our cloud-based learning management technology helps you securely manage your employee training initiatives from start to finish.**

Our technology is backed by unparalleled customer support services. When you have questions, we have answers. If you have problems, we have solutions.
