

Custom Course Development Services

Addressing the Educational Needs of Professional Associations!

Experienced in Professional Associations!

No two associations have the same training requirements, and every learner acquires knowledge in different ways. With this in mind, our custom course development team or "Pro Services" designs customized eLearning experiences for the unique needs of your association and learners. Pro Services solutions are engaging; provide clear content and concise messages, SCORM compliant and can be easily accessible via mobile devices. Through the years, Pro Services has delivered exclusive customized training programs in the association space including such topics as fundamentals of coaching and professional certification training programs, to name a few.

Fundamentals of Coaching

Whether professional or philanthropic, for employees or children, coaching comes with a great responsibility to develop people's skills and abilities. Coaches need to be adept, motivating and communicative within their disciplines. Pro Services has developed courseware to increase coaches' knowledge and teaching skills so that they, in turn, become better coaches. Courseware highlights coaching topics such as philosophy and ethics, teaching and communication, organization and administration, growth and development.

Combined, our Pro Services team has over 30 years of experience addressing the largest strategic learning imperatives from customers ranging from the US Government to Fortune 500 companies to Non-Profit Organizations to Institutions of Higher Education.

Do you have a project in mind? Contact us today: sales@ePathLearning.com or by phone (860) 444-8090

Certification Programs

Many associations provide certification programs so that members can obtain the technical knowledge and skills needed to succeed and develop their careers. Certification program coursework focuses on specialized skills, professional development, and advanced training. Testing and assessments are also a critical part of the process. In one example, Pro Services developed a certification program that transformed twenty two hours of training into twenty two engaging online learning modules that include audio, video, reference documents, quizzes and knowledge checks and that successfully cut member's training time in half.

The Pro Services Team

ePath Learning's award-winning Professional Services team includes a staff of instructional designers, programmers, media artists, media professionals, and project managers.

They maintain tremendous experience developing and delivering state-of-the art custom courses. Our team understands the principles of adult learning theories and is skilled in the process of combining information into a logical sequence to create an engaging learning experience.

Employing the latest training strategies for online, mobile-supported, and blended educational solutions, the Pro Services team follows a structured but flexible development process known as the ADDIE Model. Presentation approach and instructional strategies can include, splash animation, narrative audio, interactive explores, animations, self- checks and assessments, to name but a few.
