

FOR IMMEDIATE RELEASE

ePath Learning Announces New Content Partner Vado

August 13, 2012 - ePath Learning, Inc., a leader in cloud-based learning services, proudly announces a new learning content partner, Vado. Vado's content will now be available to ePath Learning's client base. Vado's learning courses are designed to help organizations take action to develop competencies, increase engagement, and to quickly onboard and socialize new employees. ePath Learning will deliver Vado's content through its award winning learning management system (LMS), ePath Learning ASAP.

“We are pleased to partner with ePath Learning to provide unique learning content that is “changing the face of learning,” comments Cindy Pascale, Vado's CEO. “We offer learning content in four areas: Competency Development, Engagement and Retention, Career Development and Onboarding. Our learning content is delivered in small bite sized chunks to maximize learning retention. Additionally, all courses include a step by step Implementation Guide leveraging the natural way people learn—on the job. Finally, Vado offers Mapping as a Service where, on a complimentary basis, we will map our learning content to a client's competency model, engagement survey, turnover drivers, an instructor led workshop, or any business soft skill area a company is looking to develop.”

“Short, targeted content is gaining popularity with our clients, especially with mobile delivery to their employees. With Vado's content, learners are not only gaining valuable knowledge, but have a clear action plan on how to apply what they learned to their job,” commented Charles Hellings, EVP, Sales and Marketing, ePath Learning. “We continue to see growth in the interest for off-the-shelf content residing in our LMS. In particular, clients are drawn to Vado's videos due to the shorter duration and targeted learning they provide.”

About ePath Learning:

ePath Learning develops innovative, world-class software applications that improve training and human performance for organizations.
