

ePath Learning, Inc. to Unveil Validated Learning Management System at the BIO International Convention

New London, CT, May 7, 2018 -- ePath Learning, Inc. a leading provider of cloud-based learning technology solutions announced today that they'll be unveiling their new learning management system, ePath Learning nGage™ at the BIO International Convention. nGage is a 21 CFR Part 11 validated learning management system (LMS) designed to be an integral part of the quality system for regulated companies including life sciences, pharmaceutical, and medical device manufacturers. ePath Learning, a member of BioCT, will showcase nGage on Wednesday, June 6, 2018 in the Connecticut Pavilion, booth #411.

The FDA imposes strict requirements for documenting and maintaining training records. Paper-based systems to deliver, manage, and track employee training are complex, and often wrought with human error. To minimize risk and complexity, companies are turning to learning management technology, validated for 21 CFR Part 11, to meet their compliance training needs.

ePath Learning nGage empowers organizations to minimize their business risk by streamlining compliance training processes, automating tracking and reporting, and simplifying audit procedures, all while confidently complying with FDA and GMP regulatory standards. ePath Learning's validated training solution is backed by a team of LMS industry veterans with extensive regulated industry experience.

"As highly regulated businesses face ever more stringent regulatory scrutiny, it's imperative that these organizations put systems in place that alleviate their compliance worries," stated Donna Lord, Vice President, Marketing and Product Management. "We developed nGage from the ground up to support the quality and validation requirements defined by the FDA including features such as electronic signature, versioning, data security, and a fully documented SDLC. nGage's streamlined design reduces the steps and time needed by organizations to achieve their training results. nGage empowers our clients to create the reports necessary to meet their internal audit demands, and we also support onsite vendor audits. We're really quite proud and excited to showcase ePath Learning nGage at the BIO International Convention on June 6, 2018."

About ePath Learning:
