

## **FOR IMMEDIATE RELEASE**

### **ePath Learning, Inc. Launches New Mobile Application for Enterprise Social Networking**

December 2, 2013 - ePath Learning, Inc. announced today the launch of a new mobile application for its enterprise social networking and informal learning platform, eSource. ePath Learning offers eSource fully integrated into their ASAP learning management system or as a stand-alone cloud service. The new app for Android provides enterprise users with mobile access to the features and functionality of the browser-based version of eSource – keeping them connected and informed, regardless of location.

eSource is a cloud-based social networking service that empowers employees to contribute, ask questions, share information, connect with colleagues, and search for experts throughout their organization. Employees can collaborate in teams and instantly see what others are working on, share information, post updates, and solve problems organically. The technology engages employees and augments informal learning opportunities. The functionality is similar to today's popular social networks, but eSource is private, secure, and supports multiple languages. eSource is a social network designed specifically to enhance business performance.

“We’re quite pleased to offer a convenient, fast, and secure way to access eSource through mobile devices,” stated Ms. Donna Lord, Vice President, Sales and Marketing, ePath Learning, Inc. “There is tremendous demand in the marketplace for better collaboration tools that allow users to work from anywhere at any time, and with our new mobile app, we’re meeting this demand head on by providing a social networking and an informal learning environment with a user interface designed specifically for mobility.”
